

JACO OTTO RECENT PROJECTS  
2018

## A bit about me

*Hi, I'm Jaco, I'm a user interface designer with over a decade of industry experience. I love interactive projects and have a passion for creating immersive user experiences for digital products. I usually get involved in the UX side, but am happy to focus on the interface and interaction design if the UX is in a good place ;) I have a keen interest in interactive projects that span across various platforms.*

# Channel 4

**Client:** Channel 4

**Agency:** Reason

**Project details:**

I worked closely with the internal design and product team on various Channel 4, All 4, design projects. The projects were mainly aimed at improving or extending the functionality of the All 4 website and native apps (mobile and TV). The VOD market is highly competitive and it's vital to ensure the best possible user experience, whilst keeping up with Netflix and other competitors.

On most projects I worked on everything ranging from wireframes, interactive prototypes, pixel-perfect screen design as well as animations and transitions. I also participated in various user testing sessions.

# Google Home

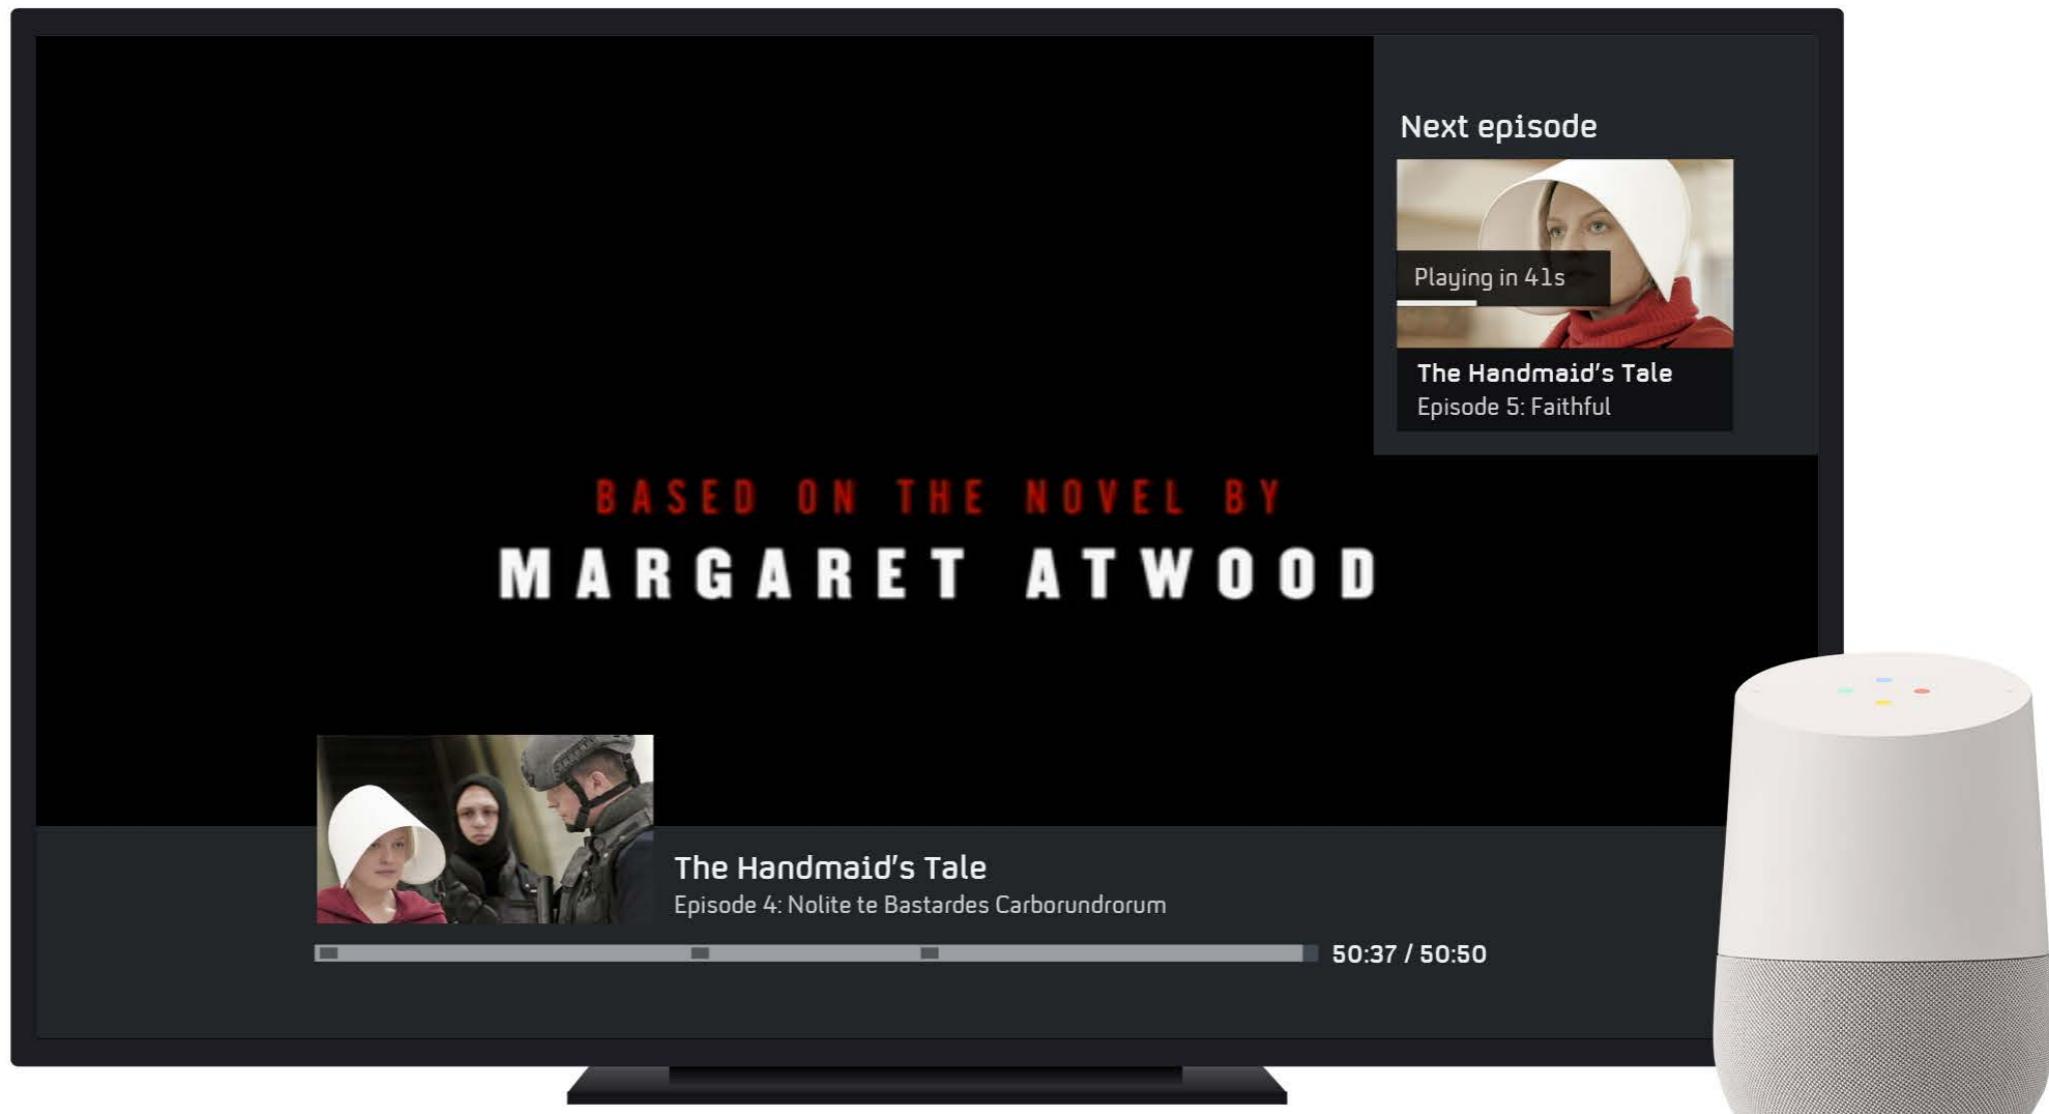

**Client:** Channel 4

**Agency:** Reason

**Project details:**

I helped with updating the existing Google Chromecast app in order to be used with Google Home Voice commands. It was a small project but a really exiting one to be involved in.

There were some challenges in terms of keeping a seamless magical experience, whilst displaying vital parental guidance information to the users regarding sensitive material.

# a Financial app

Client: a Challenger bank

Agency: Market Gravity

**Project details:** A new banking product aimed at SMEs. I worked on the UX and UI for a new product proposition within a small innovation/incubation agency.

The project required a lot of sketching, post-it noting, wireframing, prototyping and visual design in a dynamic environment working closely with the client.

The design was driven from valuable market research sessions and business insight to ensure we create a product addressing a real need for SMEs.

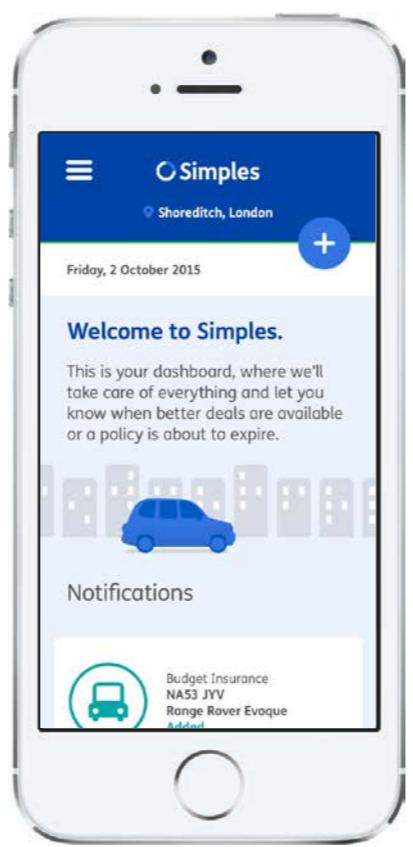

# Simples

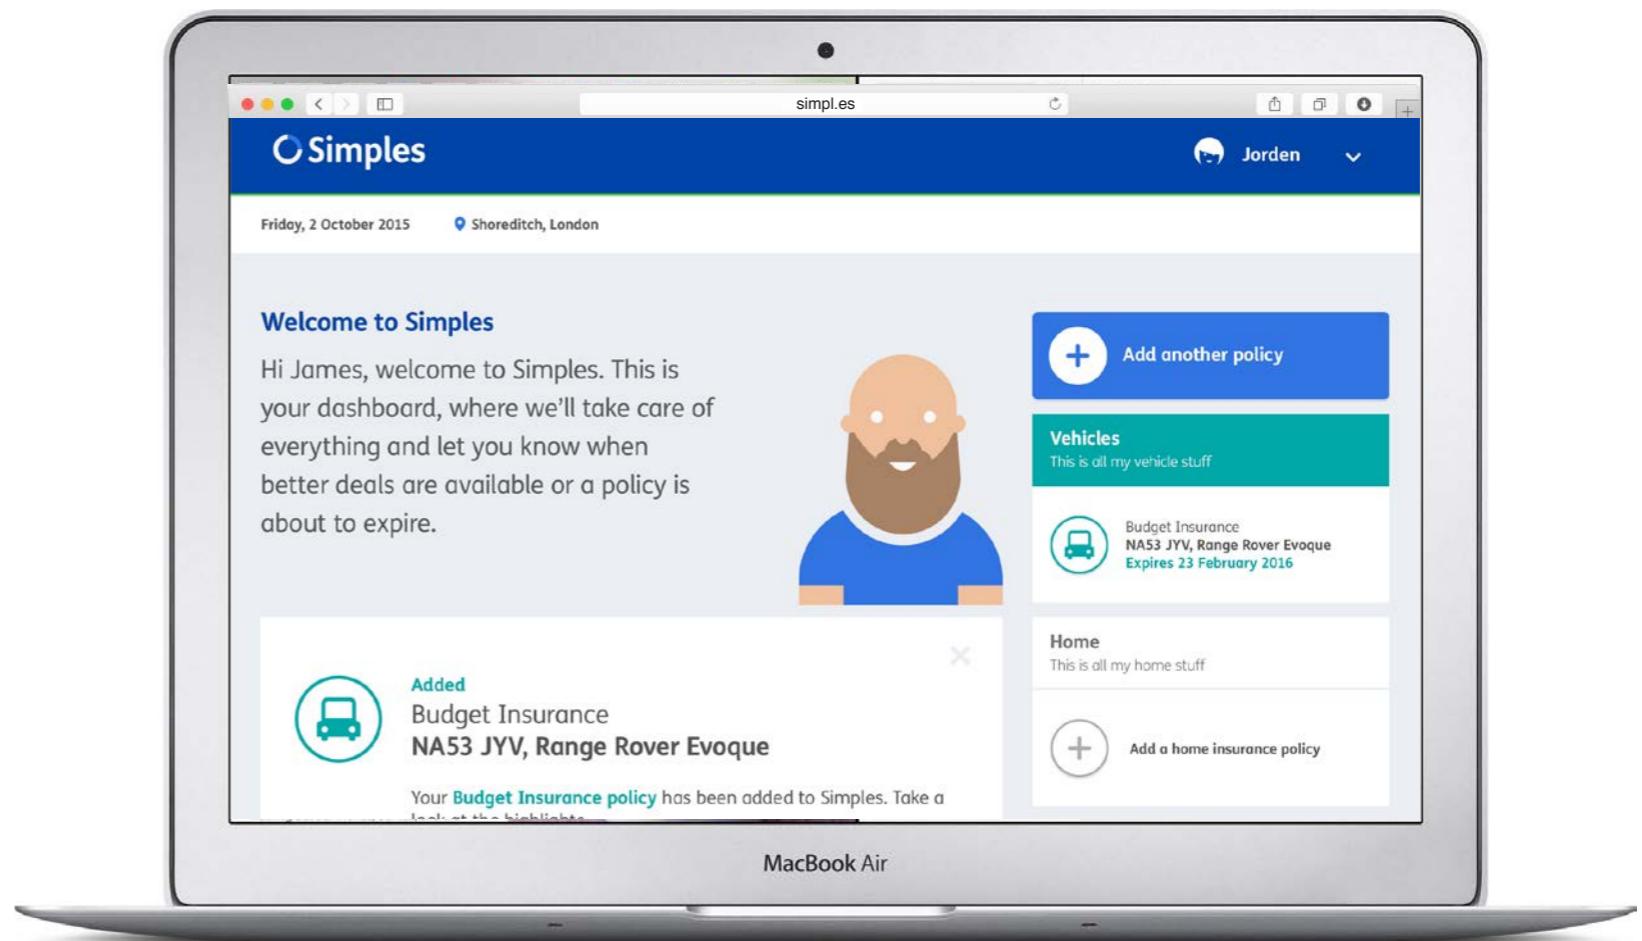

**Client:** Compare The Market

**Agency:** Albion

**Project details:** I joined this exciting project during its later stages. It was an agile project and I had to help with various parts of outstanding user interface design vital for the product's alpha launch.

MOBILE DASHBOARD

MacBook Air

DESKTOP DASHBOARD

# RBS Retail App

**Client:** RBS/NatWest

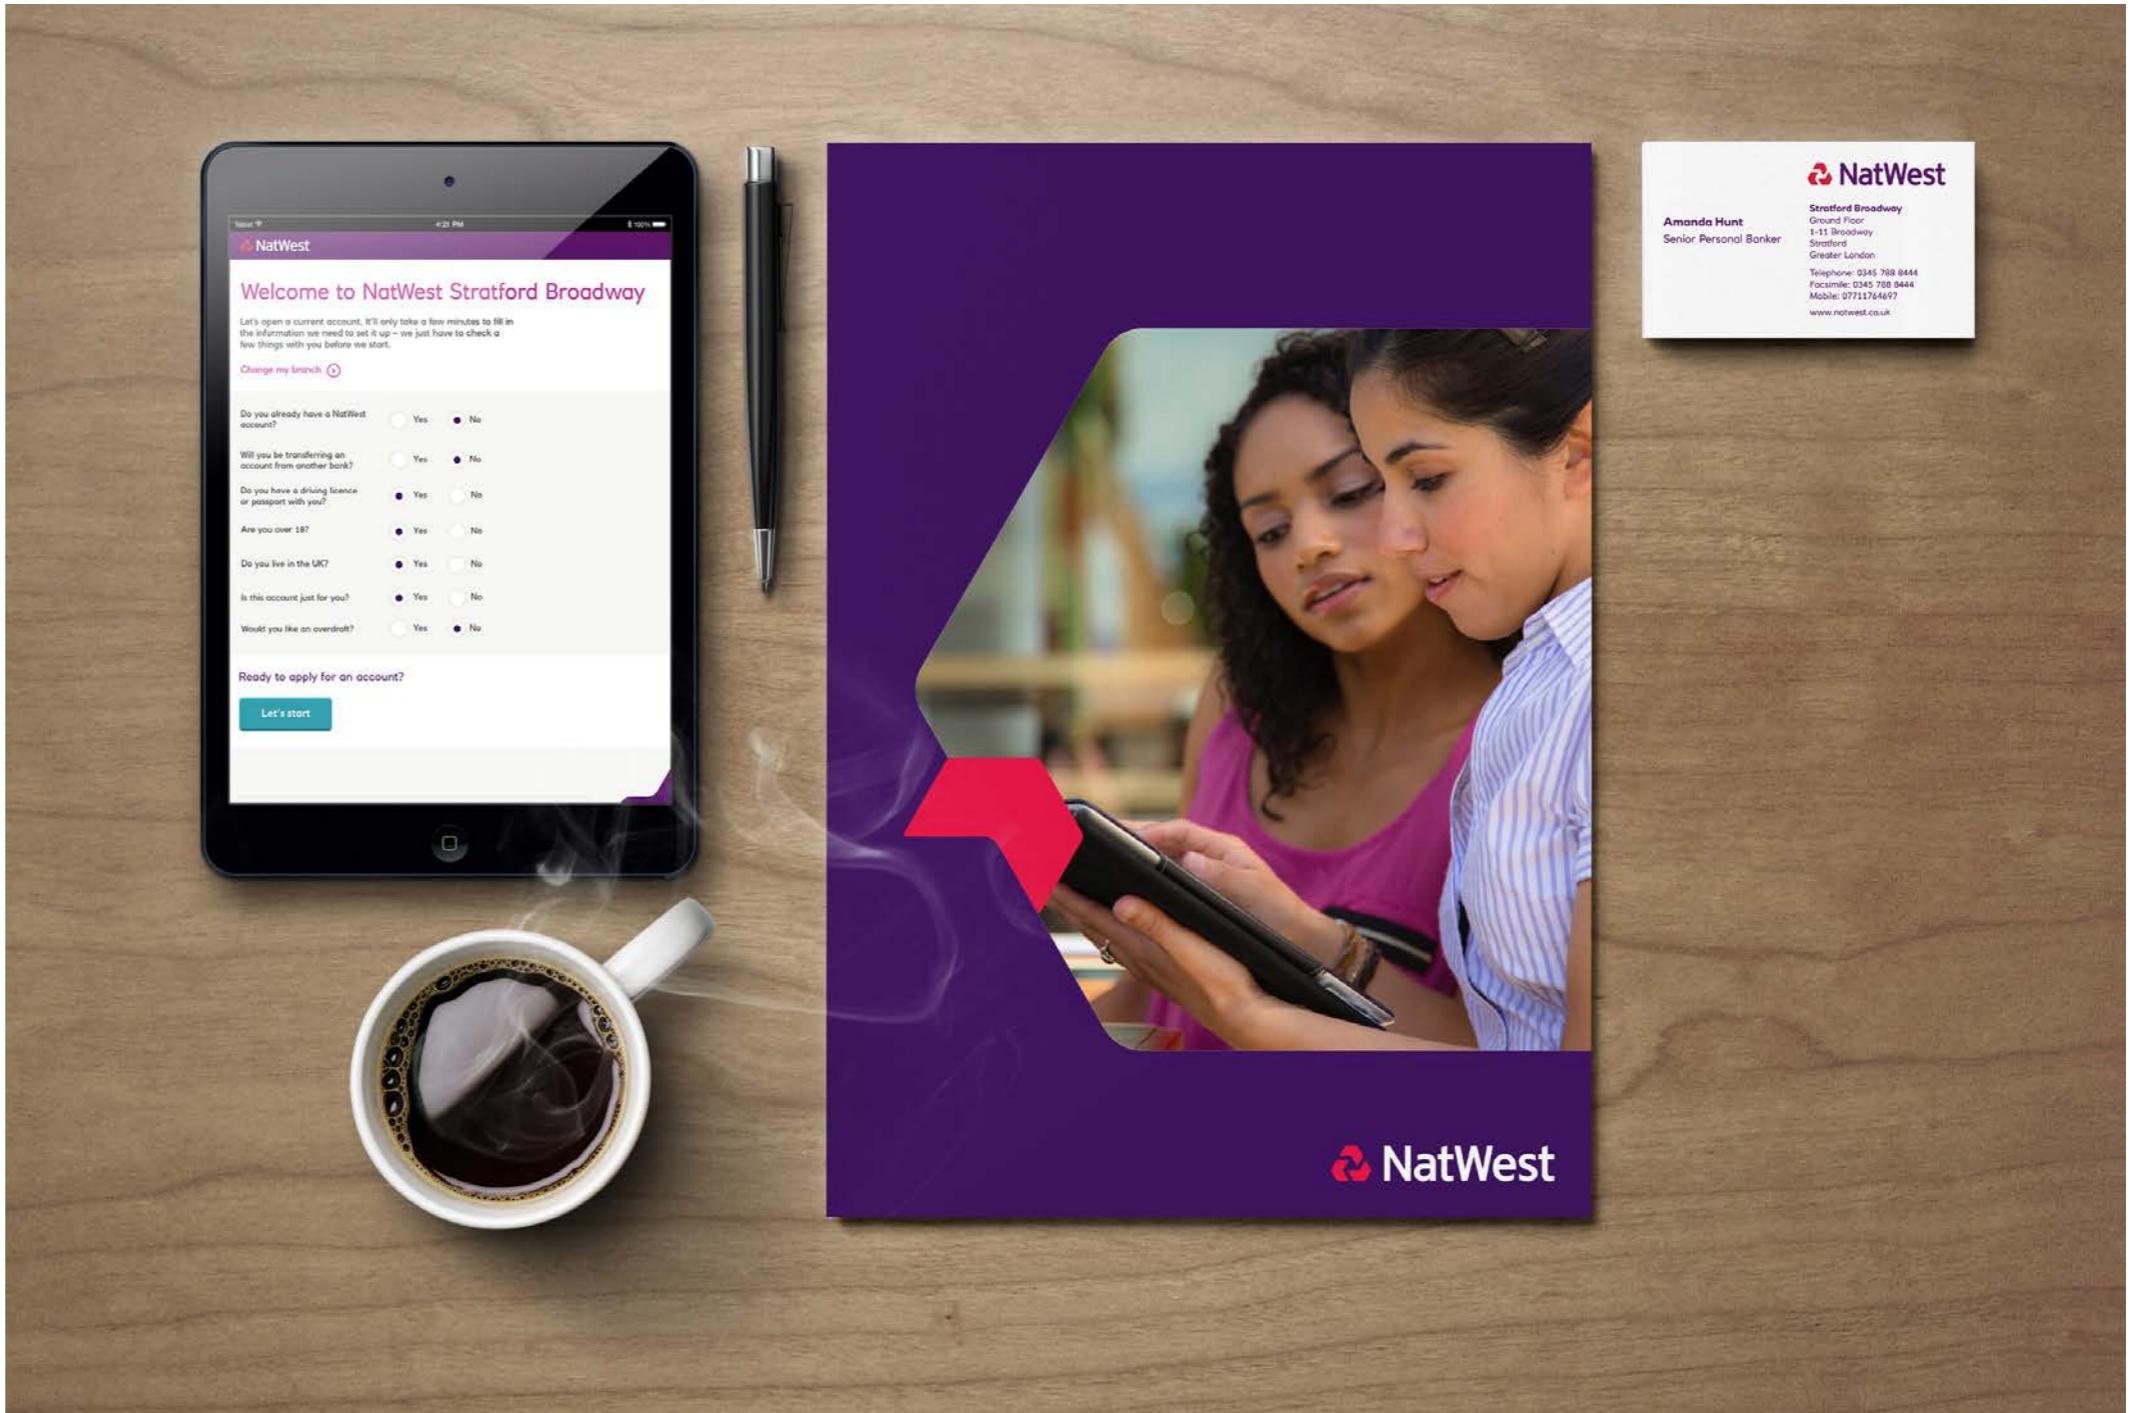

**Agency:** Sapient Nitro

**Project details:**

This was a service design project for RBS. The iPad app is mainly for opening bank accounts in-branch and would be used by both the personal banker and a new customer. The main objective was to make it as quick and easy as possible for a personal banker to open a bank account for a new customer.

This project faced many challenges, since it's essentially a service design project at a large UK bank.

Design decisions was heavily influenced by the operations model, legal department, staff training general infrastructure.

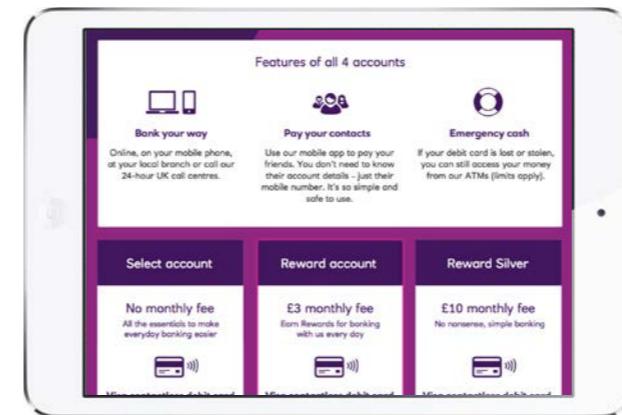

THE IPAD APP FORMED PART OF THE PERSONAL BANKERS ARSENAL

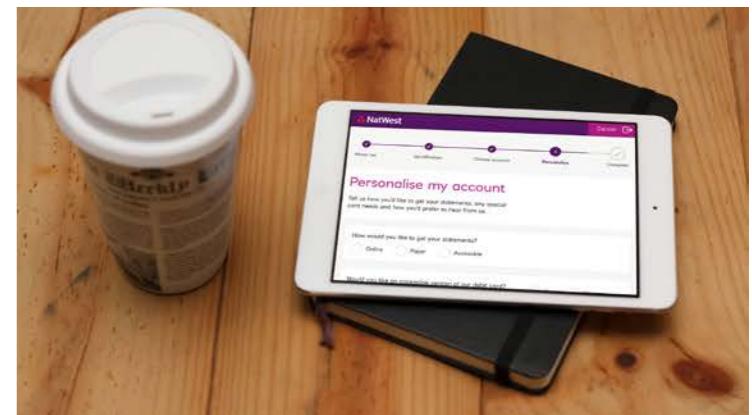

PERSONAL BANKER ASSISTING A NEW CUSTOMER

CUSTOMER LOOKING AT ACCOUNT PRODUCT FEATURES

CLEAR AND TRANSPARENT ACCOUNT INFORMATION

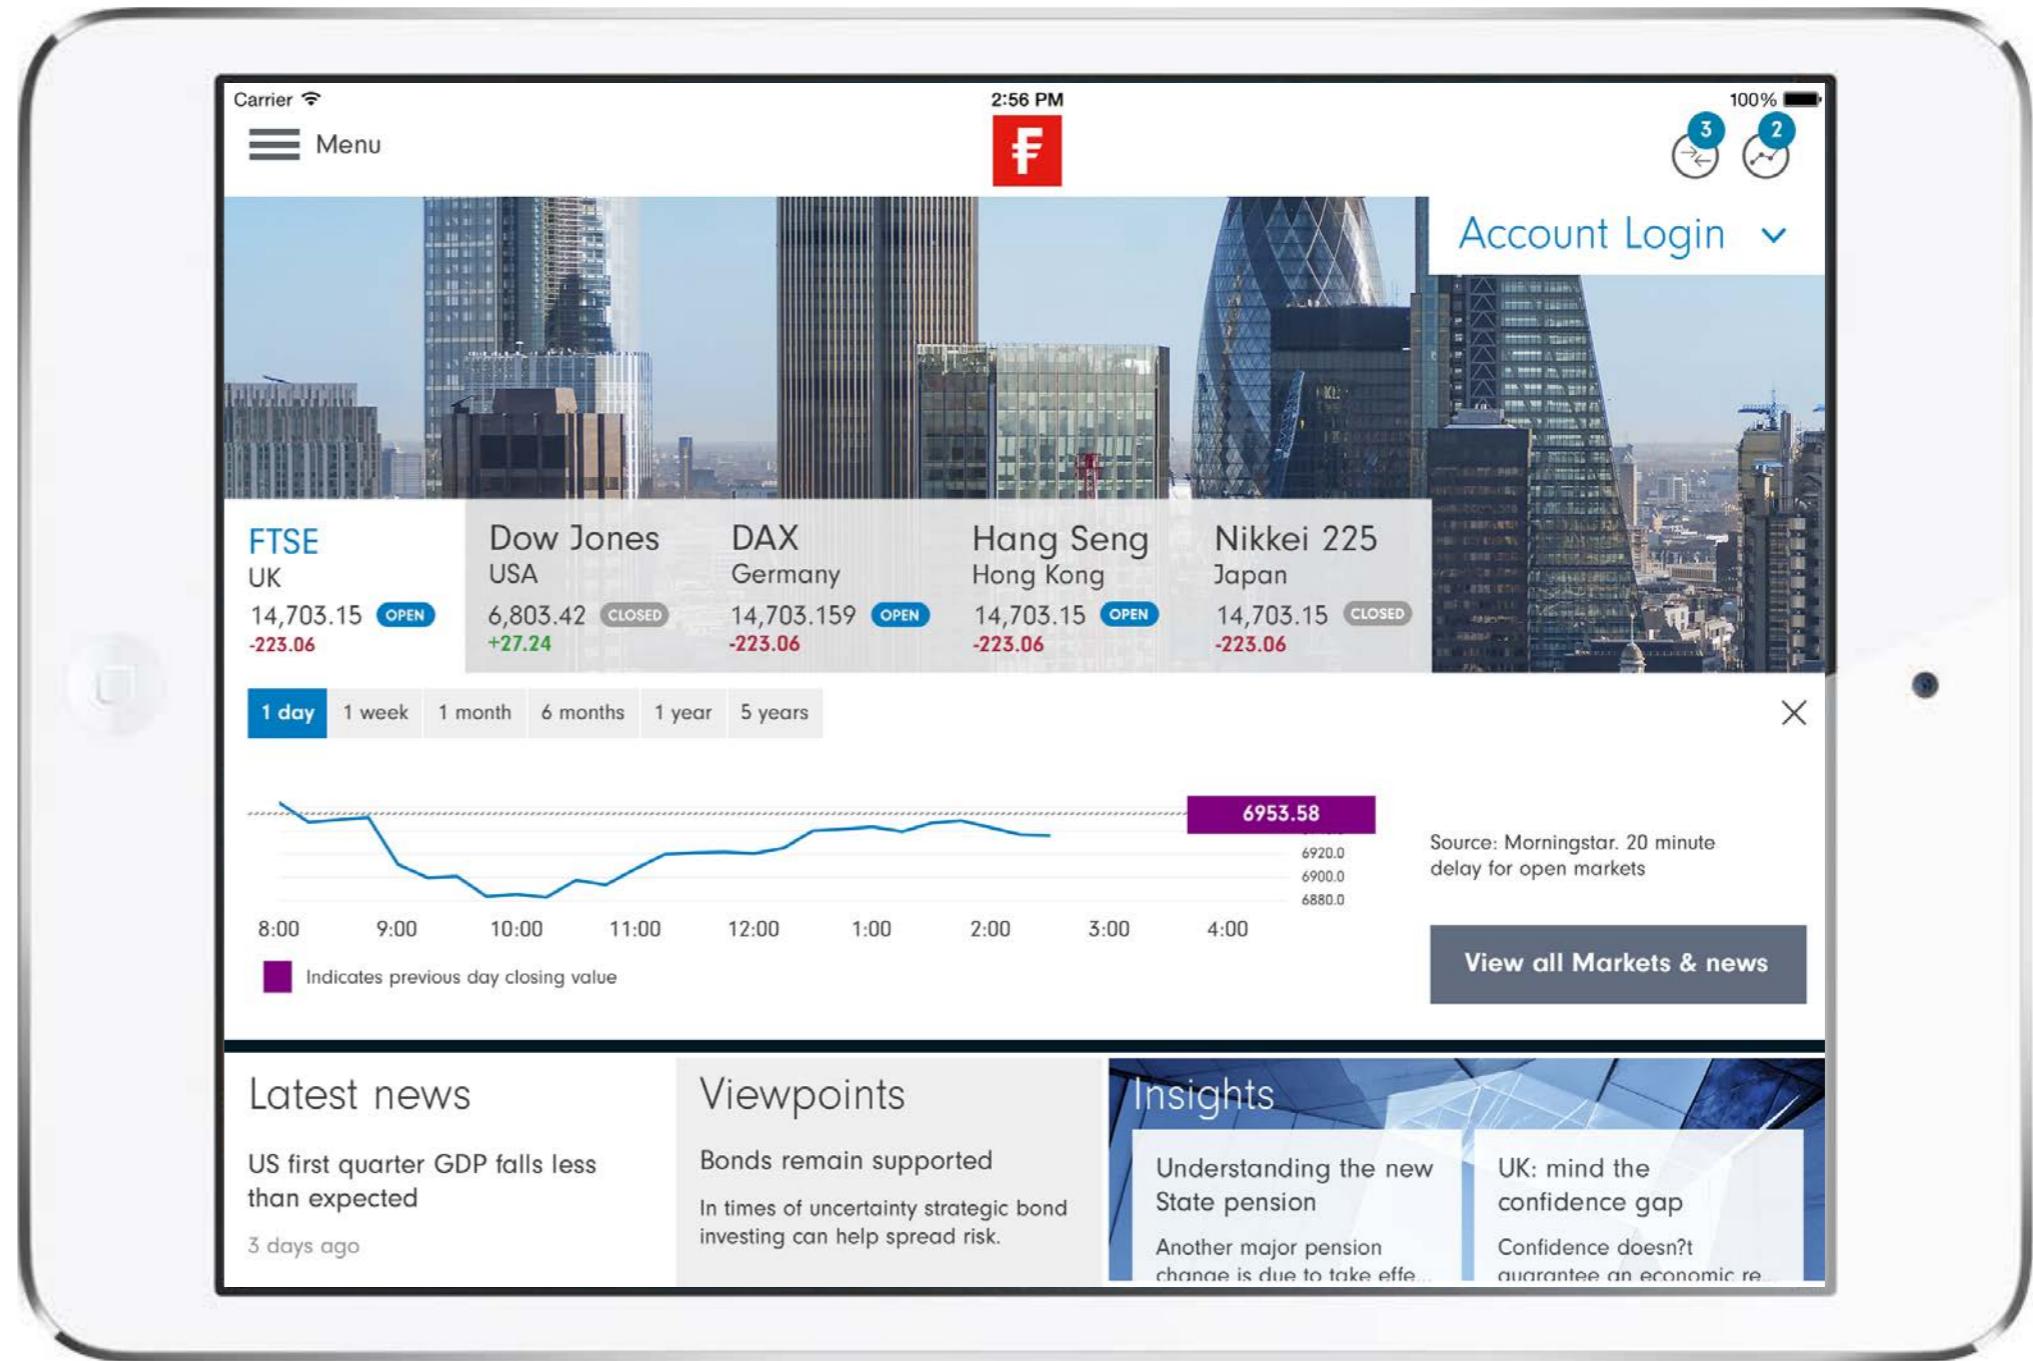

A NEW WAY TO HELP CUSTOMERS

# Fidelity iPad App

**Client:** Fidelity

**Agency:** Sapient Nitro

**Project details:** I joined this project during the final stages before it's launch. It was an agile project and I had to help with ensuring the most vital outstanding parts of functionality was designed and implemented ready for launch.

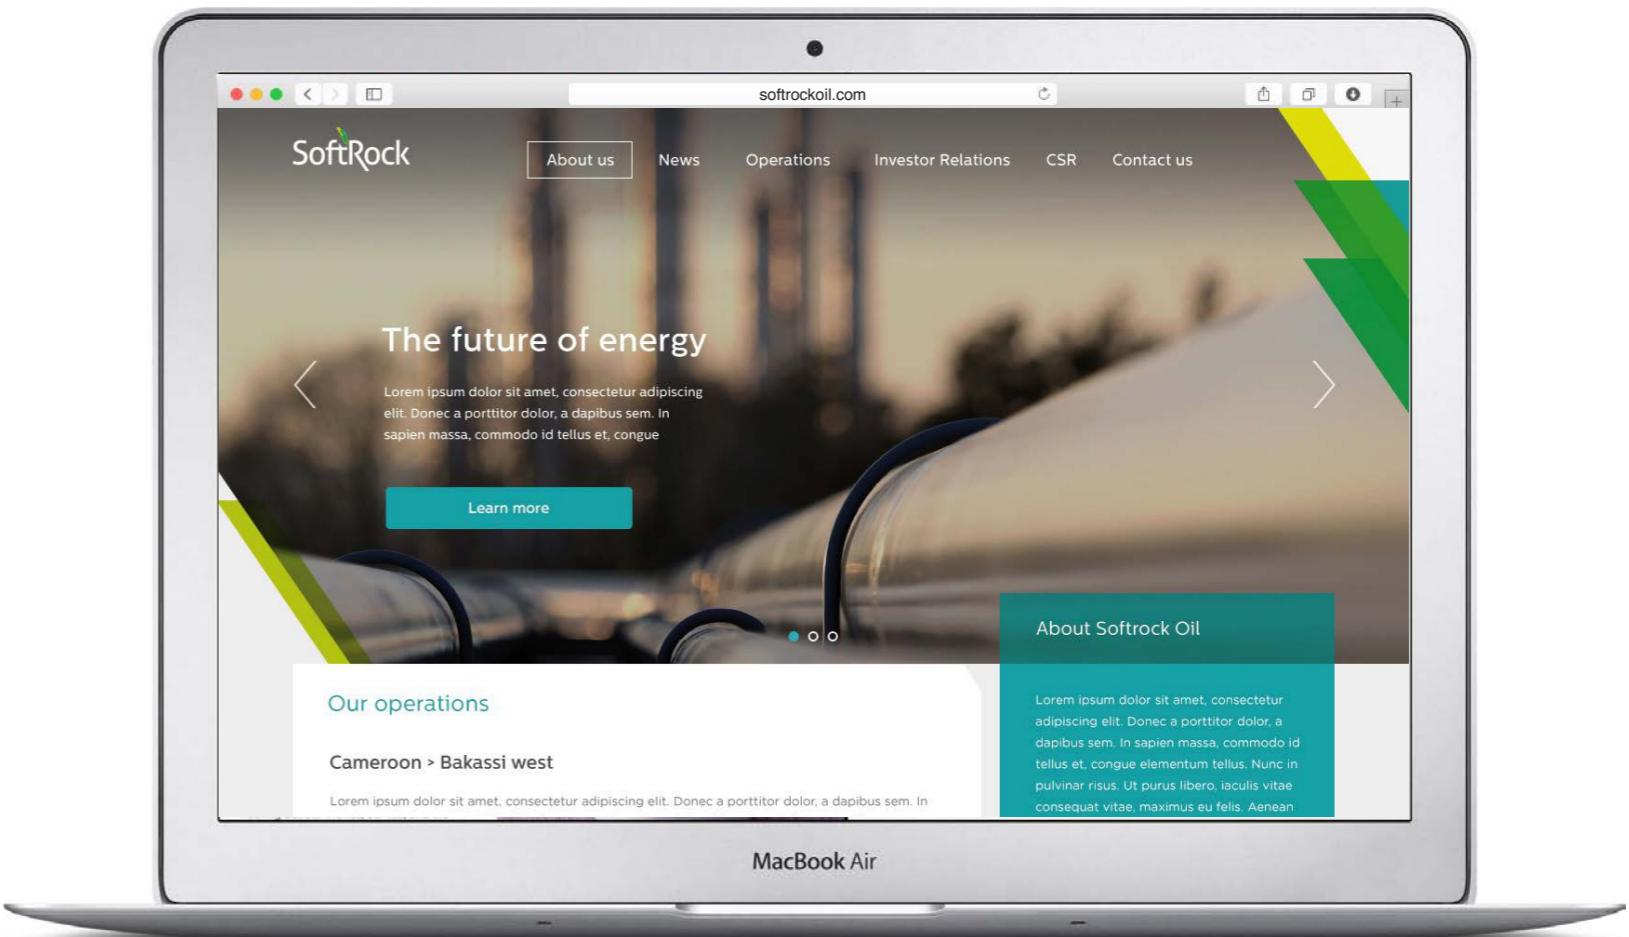

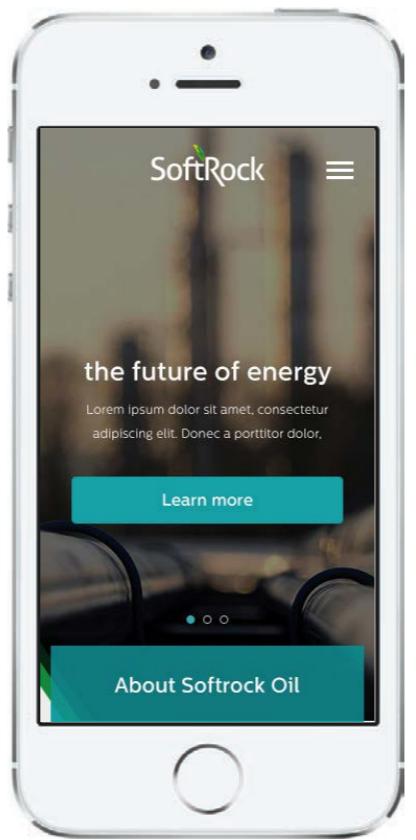

FIDELITY NATIVE IPAD APP

# Softrock Oil

Client: Softrock Oil

Project details: Responsive web design as well as an online brand refresh

SOFTRICK OIL RESPONSIVE WEB SITE REDESIGN

## FINANCIAL PRODUCTS

5K

Client: Various financial projects

Agency: 5K

Project details: I helped out in the studio on 3 different agile financial projects during a 4 week period.

RBS INTERNATIONAL BANKING

CAR DEALERSHIP FINANCE APP

CAR DEALERSHIP FINANCE APP

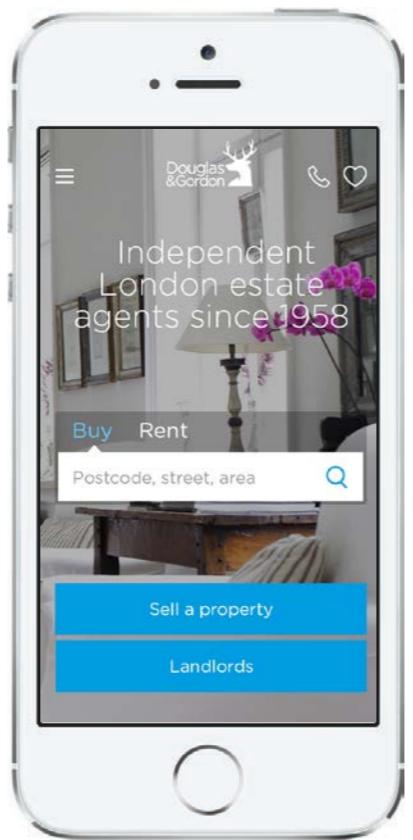

# Douglas & Gordon

**Client:** Douglas and Gordon

**Project details:** Responsive web design  
as well as an online brand refresh

High-end estate agent.

5 year old non-responsive site was in dire need of  
a refresh, with a strong focus on making it mobile  
friendly.

MOBILE BREAKPOINT

DESKTOP SITE

# Lebara Talk

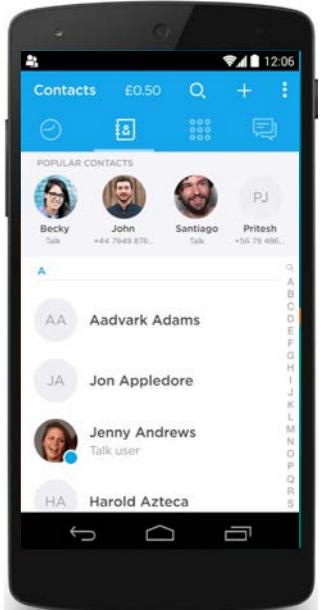

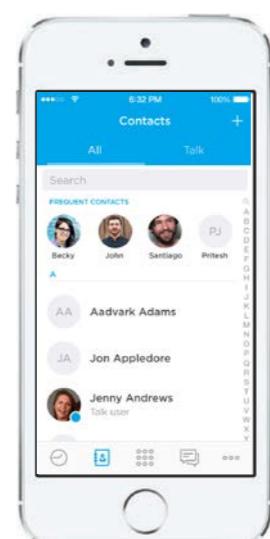

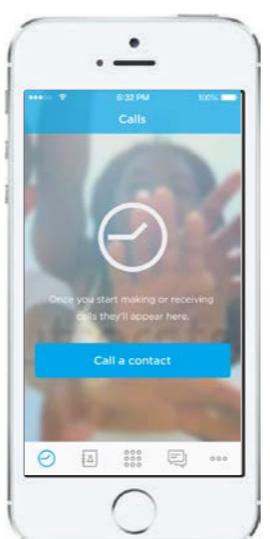

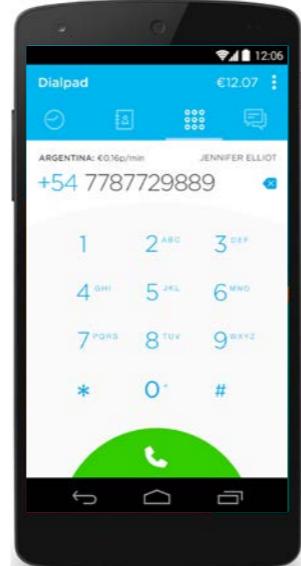

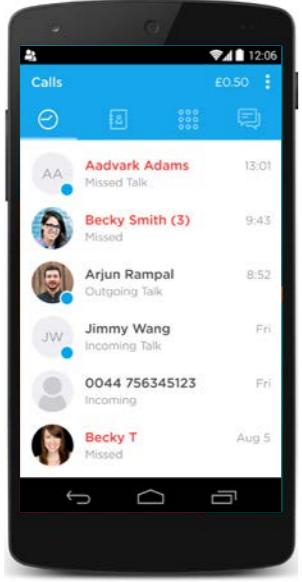

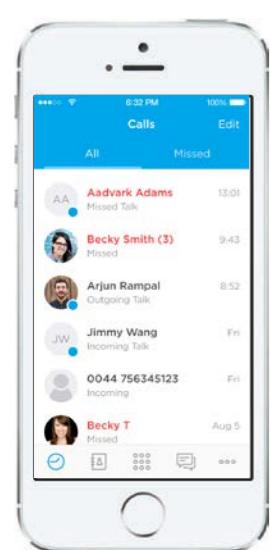

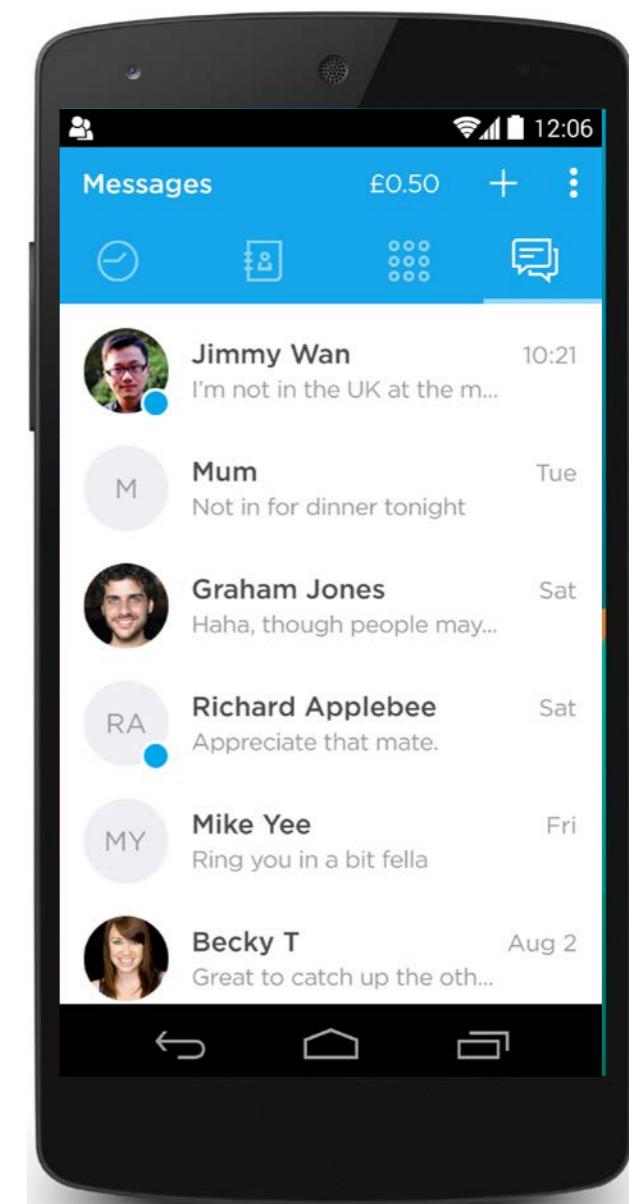

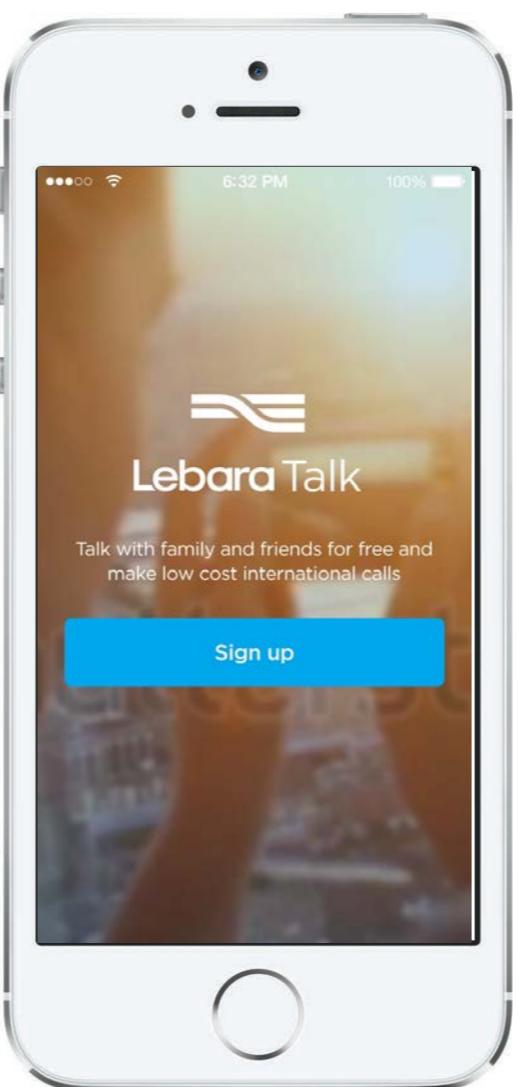

**Client:** Lebara

**Project details:** Messenger & Free/Low Cost international calls App

Lebara is a low cost international calls company connecting migrant workers with their family and friends abroad.

Taking their offline offering, of selling cheap international calling cards and providing cheap pay-as-you-go phones and contracts into the digital realm.

On this project I worked mostly on the visual side, but also to some extent on the UX.

LEFT MENU

# Remote App

Client: NPTV

Project details: Mobile Remote

Mobile Web Remote to control TV applications. The remote can be linked to a connected tv by scanning an onscreen QR code.

The initial remote was based on the Apple tv remote used at the time. A later adaptation was made based on the Dune HD remote used on later TV applications.

REMOTE DESIGNED TO REFLECT APPLE TV REMOTE

MORE COMPLEX REMOTE BASED ON DUNE HD REMOTE

# Sports App

Client: NPTV

Project details: Football App

Football app designed with the intention of being a generic sports application offering. Design was done tablet first, but with the intention of being rolled out across all devices. (TV, Tablet, Phone, Desktop)

# Weather App

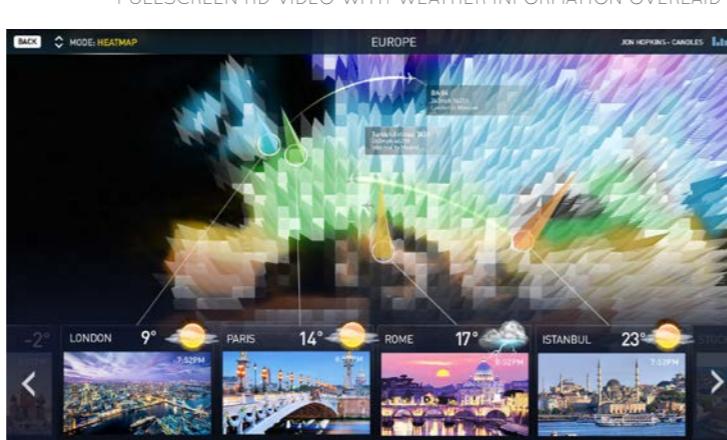

Client: NPTV

Project details: Video-centric weather

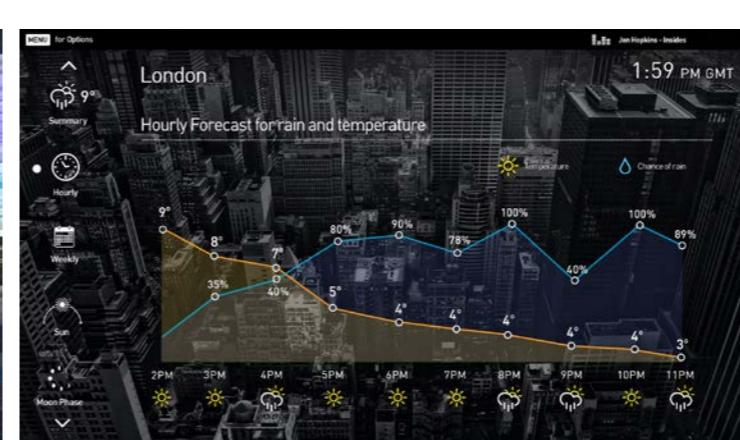

Conceptual weather application for connected TVs. The brief was to create a video and graphic rich application to showcase the power of cloud rendered video graphics across low end connected devices. The client preferred a futuristic feel as suppose to a minimalistic Metro/iOS7 feel.

3D GLOBE LOCATION SELECTOR WITH WEATHER INFORMATION "MODES"

ZOOMED IN CONTINENTAL VIEW

CITY WEATHER WIDGETS

SCI-FI WEATHER DATA VISUALISATIONS

# Eurosport WTCC

Client: Eurosport

Project details: Live Racing App

Designed key screens for a project pitched to Eurosport, working within the UX team. The project aims to showcase the power of the unique cloud-rendered video technology. Showing how it can be used to enhance live events beyond the traditional set top box or smart tv technical limitation.

MULTIPLE LIVE CAMERA FEEDS
